SUMMARY

I'm a third year computing science student at the University of Alberta with a strong foundation in algorithms, software development and web development. Along with some understanding of basic machine learning concepts. I'm seeking an internship opportunity to gain real-world experience through the application of my academic knowledge.

EDUCATION

University of Alberta

Bachelor of Science in Computing Science

Sep 2023 - May 2027

Edmonton, AB

PERSONAL PROJECTS

Product Tracker — C

Oct 2024

<https://github.com/shafin08/Product-Tracker>

- Implemented a program using C that is capable of creating a database for manufacturers to track the sales and profit of their products.
- Allows the user to track their database and make changes in real time.

Bear Problem — Python

Feb 2025

<https://github.com/shafin08/Bear-problem>

- Applied the concept of heuristic to solve a search problem using the Python programming language
- Demonstrate how heuristic algorithms aid in efficient problem solving for search problems

Sudoku Puzzle — Python

Dec 2025

<https://github.com/shafin08/Sudoko-Puzzle>

- Combine multiple search algorithms to solve 5 custom 9x9 sudoku puzzle
- The program demonstrates the ability to use multiple search algorithms together in order to solve a real life puzzle
- The core concept of the algorithms used comes from the Constraint Satisfaction Problem(CSP)

TECHNICAL SKILLS

Concepts: Algorithms, Object-Oriented Programming, Data Structures, Complex Analysis, Basic Machine Learning

Languages: Python, C, Java

Web Development: HTML, CSS, Javascript

Library: Numpy, Pytorch, Matplotlib, Pandas

Developer Tools: Git, VS Code, Linux Terminal
